1. Do you have any comments regarding the Vision?	Yes I do I think that the Council are trying to put to many new homes in green areas of gosport
2. Do you have any comments regarding the strengths of the Waterfront and Town Centre area identified in the SPD? (eg. agree, disagree, any additional ones?)	Strengths are that the new Bus Station designs are good as long as it allow existing business to continue to trade and not at higher business rates Weakness are the existing shops & business's facing the bus station should not be blocked from their view as it will affect their trade
3. Do you have any comments regarding the weaknesses of the Waterfront and Town Centre area identified in the SPD? (eg. agree, disagree, any additional ones?)	
4. Do you have any comments regarding the opportunities of the Waterfront and Town Centre area identified in the SPD? (eg. agree, disagree, any additional ones?)	
5. Do you have any comments regarding the challenges of the Waterfront and Town Centre area identified in the SPD? (eg. agree, disagree, any additional ones?)	
Theme A: Creating an Attractive Townscape	I do feel that taking valuable public car parking spaces to build homes on is total out of order, those car parks in question most days are used and are often full, also there are lots of empty properties & building that the council could convert to homes without taking from us the parking we have and our green areas
Theme B: Creating New Employment Opportunities	If you are going to create new employment in the area again the parking will be an issue
Theme C: Enhancing the Shopping and Leisure Experience	I am all for that as it attract money to the town but again they will need parking and not parking where they have to walk to far when laden with shopping

Theme D: Providing New Homes	Utilizes empty properties before taking car parks and green land, fort blockhouse will provide plenty of homes as will the immigration holding centre which is up for sale , the old police station is also prime for homes as it has some parking at the back, lots of shops in the town have empty space above them, they could be converted to flats and there is the empty centre by asda in gosport that has been empty for years that would provide lots of home in an area that is already residential
Theme E: Improving Accessibility	Accessibility is probably more important that creating new homes if we do not have the roads and access to cope it won't work, haslar bridge was strengthened a few years ago it won't cope with the traffic and it could have been widened to accommodate two lanes instead of one with traffic lights
Theme F: Improving Public Realm and Green Infrastructure Provision	We have a fantastic green area as it is but people don't know about it unless they live in the town centre, our green space is more than adequate just needs a little TLC and advertising and using more
Theme G: Managing Flood Risk	Always high priority and should be taken in account with the new infrastructure
Theme H: Providing Appropriate Infrastructure	Appropriate Infrastructure would be one that the residents have been able to have an input and where their views are taken into account
Theme J: Creating a Healthier Town	We can all dream, there a lot of issues that need to be address before we have a healthier town which looks run down with lots of empty shops it needs modernising and a face lift this includes the bus station and the high street nd the homeless problem needs to be address, shops are having to put up extra secure gates to their premises to stop them sleeping in the door ways
The Bus Station and Falkland Gardens	My concerns are that if they do rebuild the bus station creating homes and jobs that it will not be in keeping with the rest of the area, question is how to bring things up to date without making the rest of the town look aged and shabby
Gosport Waterfront North of Mumby Road	
Royal Clarence Yard and the Retained Area	
North of the High Street	
The High Street and associated areas	
South Street	

Trinity Green area	This area is well kept and lovely green space it is steeped in history if people took the trouble to find out, the church has lots of activities on to attract people into the town the millennium circle is not used enough and it is not advertised that people can hire this area for functions such as bands, dancing etc
Haslar Marina	Again the bridge needs widening but the marina is more than a tourist attraction with sailors and people visiting the submarine museum
The Gosport Lines	
8. Is there anything in the SPD that particularly concerns you and why?	yes taking away valuable car parking, building homes of a small size cramming in as much as they can on a small plot and taking away precious green areas, not taking into account the strain all these extra homes will make on our already congested roads
9. Are there any other sites within the Waterfront and Town Centre area which have potential for development?	Fort Block house, get haslar building moving, the bust station leave the rest alone
10. Please can you give any suggestions of what else the Council should consider to include in the final version of the SPD?	They should consider residents views more and any changes to be sympathetic to the building around them and not making them look to dated and grubby
11. Please include any comments you may have	I do feel this has not been thought through very well and the general public were not made aware of this until it was almost to late, advertising on unknown and not used radio stations, not eye catching advertising, Gosport has been changed often over the years and not always for the best, long term views have to be considered of future changes, over populated areas, over stretch roads, I could go on but I am sure none of this will be taking into consideration, we already have a hotel being built in the town which will create new jobs, revenue for the town and hopefully tourists who wish to see the heritage we have and also travel over to Portsmouth, please be sympathetic to the existing building and first used up empty buildings that can be converted and with the hindsight that fort blockhouse will create a large number of homes without taking up green areas and cramming in properties which will encroach on local residents living the in the areas affected
12. Please could you complete your contact details	J Corrie
