Dear Mr Payne – Comment on Gosport Borough Local Plan 2011-2029  
Publication Version July 2014

1. Residential Development on Rear Access Ways

Following our conversation, we have looked at Policy LP10 DESIGN f) Ease of Movement and also the SPD Design Guidance Site Accessibility (pg.10), the most relevant seems to be the LP10 Ease of Movement. Bearing in mind that rear access ways are typically only 9ft wide, unlit and lacking pavements we feel that this should make residential development on rear access ways unacceptable.

Even so we would like to see more specific guidance included making it clear that residential development on rear access ways will not be permitted.

Yours sincerely

Alison Roast
